

POLAR OPTICS OveRx SUNGLASSES & CLIPONS

144 million people cannot wear plano sunglasses but need UV protection!

65% of the U.S. population wear prescription eyewear and, therefore, cannot wear regular plano sunglasses. Polar Optics offers a premium line of OveRx sunwear that are specifically designed to be worn over prescription eyewear. Both product types feature optically correct polarized lenses with super hard scratch coatings that provide 100% UVA and UVB protection and maximum glare reduction.

OveRx Sunglasses

- 40% more coverage than standard sunglasses for unsurpassed UV protection
- Isolates eyes from wind, rain reducing fatigue and strain
- Flex2Fit temples for outstanding comfort and adjustability
- Patented design easily slips over prescription frames

OveRx ClipOn

- Lightweight sun protection for all day comfort
- Patented Xspan frame for superior durability
- Gentle Grip prongs eliminate frame scratching and are adjustable
- Custom hard case

Advanced UV protection has never been more affordable.
